RULING ON ENTITLEMENT¹

On January 4, 2021, Lidija Zekanovic filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered a left shoulder injury related to vaccine administration resulting from an influenza vaccine received on October 6, 2018. Petition at 1. Petitioner further alleges that she received the flu vaccine in the United States, she suffered residual effects of her injury for more than six months, and no civil action for damages has been brought, nor has any settlement or award in a civil action for damages been collected, for her vaccine-related injury. Petition at ¶¶ 2, 9-11; Ex. 2 at 2, 4. The case was assigned to the Special Processing Unit of the Office of Special Masters.

¹ Because this unpublished Ruling contains a reasoned explanation for the action in this case, I am required to post it on the United States Court of Federal Claims' website in accordance with the E-Government Act of 2002. 44 U.S.C. § 3501 note (2012) (Federal Management and Promotion of Electronic Government Services). **This means the Ruling will be available to anyone with access to the internet.** In accordance with Vaccine Rule 18(b), Petitioner has 14 days to identify and move to redact medical or other information, the disclosure of which would constitute an unwarranted invasion of privacy. If, upon review, I agree that the identified material fits within this definition, I will redact such material from public access.

² National Childhood Vaccine Injury Act of 1986, Pub. L. No. 99-660, 100 Stat. 3755. Hereinafter, for ease of citation, all section references to the Vaccine Act will be to the pertinent subparagraph of 42 U.S.C. § 300aa (2012).

On August 29, 2022, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent agrees that "petitioner had no history of pain, inflammation, or dysfunction of her left shoulder; pain occurred within 48 hours after receipt of an intramuscular vaccination; that pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* at 6 (footnote omitted). Respondent further agrees that the records demonstrate that Petitioner suffered the residual effects of her condition for more than six months, and therefore has satisfied all legal prerequisites for compensation under the Vaccine Act. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
